Lie symmetries for 1D and 2D flow equations

Rodica Cimpoiasu and Vily Cimpoiasu University of Craiova, 13 A.I.Cuza, 200585 Craiova, Romania

Abstract

The paper deals with the classical symmetry approach to determine the Lie symmetries for two flow equations: the 1D Burger's equation and the 2D general nonlinear heat one, in two particular cases. The invariants and the simmilarity solutions for these cases are pointed out. Keywords: Lie symmetry approach, nonlinear dynamics
